Correct Answer: B

QUESTION 3

Which of the following computer connector types was designed specifically for allowing high-speed external hard drive transfers?

A. DVI

B. USB

C. eSATA

D. HDMI

Correct Answer: C

QUESTION 4

Ann, a user, is browsing shopping websites on the Internet when she receives a pop-up message on her screen indicating a virus has been detected by the antivirus software.

Which of the following actions should be performed NEXT?

A. Ignore the message because it is likely adware.

B. Run a scan on the entire local drive.

C. Clear temporary files and folders.

D. Minimize the alert and continue browsing the Internet.

Correct Answer: B

QUESTION 5

An employee\\'s new computer came with a free 30-day trial version of antivirus software. The employee\\'s company provides enterprise antivirus software from a different vendor. Which of the following should the employee do in order to use a full version of antivirus software?

A. Enter the company product key for the antivirus software, enabling the full version.

B. Uninstall the current version antivirus software and install the company version.

C. Verify Internet connectivity and run online virus scanning software.

D. Update the trial antivirus software to the latest version.

Correct Answer: B

QUESTION 6

You are responsible for tech support at your company. You have been instructed to make certain that all desktops support file and folder encryption. Which file system should you use when installing

Windows XP?

A. FAT

B. EXT4

C. FAT32

D. NTFS

Correct Answer: D

NTFS is the file system first introduced with Windows 2000 and it inherently supports file encryption as well as other

exciting features such as file compression.

What is NTFS?

NTFS is an advanced file system designed for use specifically in Windows NT, Windows 2000/2003, and Windows XP operating systems. It supports file system recovery, large storage media, long file names, and other features. NTFS offers

features such as disk quotas, distributed link tracking, compression, and mounted drives.

NTFS also offers security features, such as encryption and file and folder permissions.

These features are not available on FAT volumes.

Answer options A and C are both incorrect. FAT is an old file system used with DOS and Windows

3.1. FAT32 was simply a 32 bit version of FAT and was used with Windows 95 and Windows 98.

Neither FAT nor FAT32 support file or folder encryption. Answer option B is incorrect. EXT is a file system used with Linux and does not work with any version of Windows.
